

## Meet Softnoise at Internoise 2018

Softnoise is present at Internoise 2018 in Chicago. Please feel free to visit our Softnoise booth and receive the latest information on Predictor-LimA 2019, Oden, iNoise and NoiseAtWork.

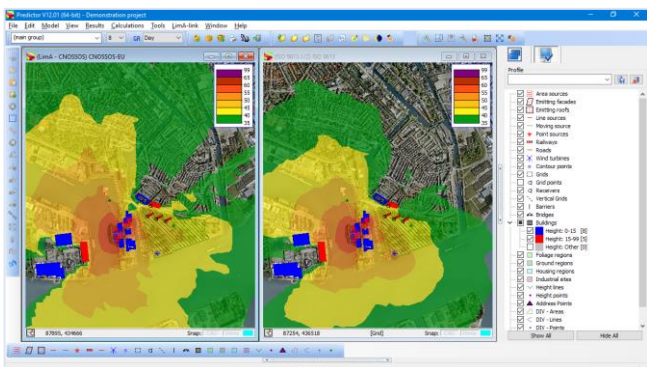

*Softnoise sells her products through distributors.*

## New Predictor-LimA 2019 announced!

Predictor-LimA V12 is by far the most powerful, intuitive and complete software suite for environmental noise prediction and mapping on the market. The new 2019 portfolio, that will be released in the autumn this year, will make the suite even more competitive.

With the powerful LimA macro options you can automate your complete workflow.

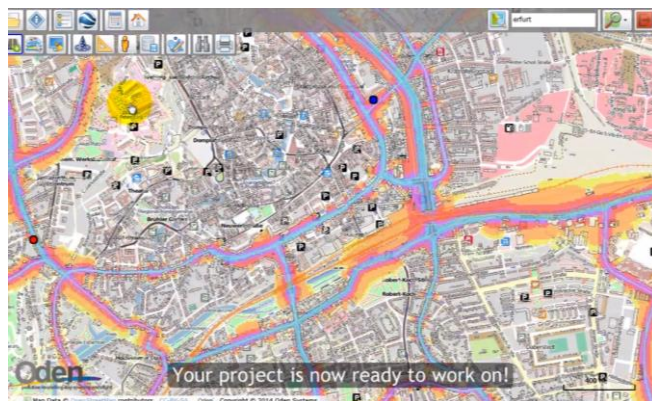

The unique integrated version control and multi-model project organization of Predictor ensures reproducibility, saves valuable time and leads to higher quality. The intuitive Windows GUI of Predictor feels familiar from the start. Comparing models using the multi-model interface is extremely easy. Simply open the models side by side, use the Table of Comparisons or show the difference contours.

*Predictor-LimA is distributed by EMS Brüel & Kjær.*

## On-line modelling with Oden

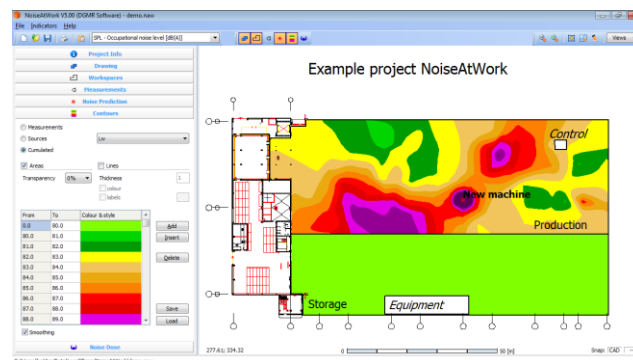

ODEN is an online web application that is simple to use and requires little operator training. Installation is easy as it runs in your browser. It utilizes preconfigured baseline data to save it's private and public sector clients millions of dollars annually.

*Oden is distributed by Stapelfeldt GmbH.*

## Map anything with NoiseAtWork

NoiseAtWork is an extremely easy to use tool for reporting any type of measurement as interpolated contours. Examples are Noise in dB(A), Temperature in °C, Humidity in % and Gas concentration in ppm. Optional add-ons are Noise Dose and Noise Prediction.

*NoiseAtWork is distributed by DGMR Software B.V.*

### Latest releases by our distributors

- » [Predictor-LimA V12 \(B&K\)](#)
- » [NoiseAtWork V5.1 \(DGMR Software\)](#)
- » [iNoise 2018.2 \(DGMR Software\)](#)
- » [Oden 2018 \(Stapelfeldt\)](#)

### Events - We look forward meeting you!

- » Internoise 2018 : 26-29 Aug, Chicago
- » Acoustics 2018 : 6-9 Nov, Adelaide
